

CQB

[LOCATE DISTRIBUTOR](#)

Product Description

The RTS CQB Connector will transform a static RTS target system into a reactive target system. As with the Smart Joint, the CQB Joint can be used for tactical training, for "Shoot until disabled" scenarios or for recreational training and shooting contests. What

sets the CQB Joint apart is the fact that it will cause the target to fall parallel to the pole, making it ideal for placing the target next to walls during CQB "kill house" scenario drills. Used by LE agencies worldwide.

Product Advantages

- Will fit all RTS target boards and poles
- Enables placing the target close to walls and other objects
- Safe for use in all ranges, including point-blank target practice
- Can be mounted and adjusted quickly and with no tools needed.
- Lightweight, easy to setup, transport and store

Compatibility

- F.A.B RTS static target systems

Specifications
