

DXB

LOCATE DISTRIBUTOR

Product Description

The DXB is the 2nd generation of our Hybrid Expandable Baton, made from composite polymer and steel. Featuring a complete redesign, the new DXB is stronger and more ergonomic than the previous HXB. The new ergonomic grip features aggressive rubber over mold and exposed control area for pressure points manipulation, thicker segments and steel reinforced tip. The DXB is your new self-defense tool. Once expanded, the DXB will remain securely locked in place until you retract it by tapping the tip down on a hard surface.

Product Advantages

- Reinforced hybrid structure of steel & polymer ensures durability & strength in a lightweight

- Made of three sections the DXB expand to an ideal 21.6" / 55 cm with Just a flick of the wrist
- Tubular shafts are molded from reinforced composite polymer
- The last expand shaft is reinforced by a steel core and a steel tip
- Ultimately corrosion resistant
