

FRBS Offset Kit

LOCATE DISTRIBUTOR

Product Description

Offset Folding Backup Sights Kit

Product Advantages

- Designed as a back-up sighting solution for use in conjunction with magnification lenses during CQB scenarios
- Sleek design with minimal protruding parts
- No tools needed for a quick and easy elevation and wind adjustment
- RBS – Rear Back-up sight can be manually adjusted for windage
- FBS – Front Back-up sight can be manually adjusted for elevation
- Available in both right and left side variations
- Durable fiberglass reinforced polymer and metal construction

Compatibility

- 1913 MIL-STD Picatinny rail.
