Product Description

The Fab Defense® Helmet-Mounted Rotating 360° Picatinny Rail System is a tough, versatile upgrade for military, tactical, and search & rescue operations. This system lets you easily attach and rotate Picatinny-compatible devices, such as flashlights or

cameras, around your helmet for maximum convenience—keeping your hands free.

Product Advantages

- **360° Rotation:** Easily adjust your gear in any direction, without removing the device. Perfect for repositioning flashlights, cameras, and other accessories.
- **Universal Compatibility:** Works with any Picatinny-compatible device, so you can mount and adjust a wide range of equipment.
- **Secure Mounting:** Attaches firmly to your helmet, keeping gear stable even during intense movement.
- **Built to Last:** Made from tough materials to withstand extreme conditions.
- **Quick & Easy Setup:** Simple to install on most standard helmets with Accessory Rail Connectors (ARC).
- **Enhanced Functionality:** Add and adjust multiple accessories to make your helmet more versatile.

Compatibility

- Designed for tactical helmets with Accessory Rail Connectors (ARC).
