

HXB

LOCATE DISTRIBUTOR

Product Description

HXB Hybrid Expandable Baton is a powerful and super light self-defense device.

Product Advantages

- Tubular shafts are molded from space age composite polymer, the smallest and last expand shaft is reinforced by a steel insert and a steel tip.
- Hybrid structure of steel and polymer ensures it's durability and lightweight
- Ultimately corrosion resistant and flexible tubular shafts provides a whip like stroke characteristic
- Grip is over molded and bonded with non-slip rubber
- Three separate sections expand to an ideal 22in/56cm with just a

flick of the wrist

- Folded carry position is just 9in. long
- Weighs only 270 gr. / 0.6 lb
- Once expanded, the baton will remain securely locked in place until retracted by tapping the tip down on a hard surface.
- Includes a ballistic nylon holster and fits on belt or MOLLE system vest
