

M1

Scopus® M1 With Level 1 or 2 Retention System

LOCATE DISTRIBUTOR

Product Description

Two separate retention mechanisms lock automatically and ensure secure handgun retention, without sacrificing ease of deployment and use. SCORPUS LEVEL 1 HOLSTER The SCORPUS Level 1 Holster features two separate passive retention mechanisms that automatically secure the handgun by capturing the trigger guard. Both retention devices are pressure-activated. To draw the handgun, the operator must firmly grasp the grip and perform a clean draw. - Passive Retention Catch (x2) SCORPUS LEVEL 2 HOLSTER Previously known as the R models [Retention], the SCORPUS Level 2 Holster incorporates two distinct retention devices. It includes a pressure-activated locking lever and a spring-based retention device, both working together to secure the handgun. Even if the locking lever is deactivated, the spring-based retention device will still hold the handgun in place. To draw the handgun, the operator must firmly hold the grip, press the pressure-activated locking lever, and then execute a clean draw. - Pressure-Activated L

Product Advantages

- COMMON FEATURES OF THE SCORPUSR OUTSIDE THE WAISTBAND HOLSTERS
- Anti-rattle pressure tab for tight and secure fit
- Excellent handgun protection in a slim and streamlined design
- Special finger channel design, keeps index finger safely positioned during draw
- The ScopusR Retention System
- Durable reinforced polymer construction

Compatibility

- Scopus M1/M24/MX/MTR support the following firearms:
- Glock G17, G19, G20, G21, G22, G23, G26, G27, G29, G30, G31, G32, G33, G34, G35, G41, G43
- SIG SAUER P226 models excluding the MK 25 models
- S&W M&P 9/40 full frame and Pro models
- H&K USP 9mm/40/45 Full-size and compact models
- Makarov PM
- Jericho full frame 9mm / .40 Steel and Polymer models
- 1911 5" Barrel, including Colt government models railed and non-railed
- CZ 75 SP-01 Shadow
