LOCATE DISTRIBUTOR

Product Description

Mechanical Swinging Target - Kit (MST Kit) The MST will transform a static RTS target system into an interactive system, allowing precision and speed training sessions. Connect a cord and pull for rotating the target toward the shooter, let go and it springs back

into place RTS-MST system consists of a static selfhealing target set and a mechanical swinging target joint, which has to be connected to a rope. The RTS-MST system is built up like a static target kit, only between the base and the target pole the included mechanical swinging target joint is used. The moment somebody pulls the rope, the swinging target joint allows the target to rotate by 90 degrees (turner) ==**Included in the kit:** 1 x Base and Plate
1 x Pole (Target Board Pole) (Consist of 2x Poles of 60cm plus 1x Connector) 1 x MST (Mechanical Swinging Target) Joint (without rope) 1 x IPSC Upper Torso (Selfhealing Target Board)

Product Advantages

- Fits all of the RTS static target systems
- Adapter allows the target to rotate by 90 degrees (turner)
- Spring loaded, target will snap back into place
- Improves training control by allowing the instructor to move the target at will
- Polymer and aluminum construction for durability and performance

Compatibility

- F.A.B RTS Target Systems.
- Suitable for use with any type of handgun or SMG ammunition

Notice:

- Operational temperature range: -10-50 degrees Celsius
- Fixing stakes for outdoor use of the target base can be ordered as an accessory

Caution!

- Do not use ""Wad cutter"" & ""Hollow Point"" bullets!
