Product Description

- M1 is our first and most familiar holster configuration; with interchangeable belt adapters and Cant adjustment of 20 degrees, the holster can easily change from zero Cant up to ± 10 degrees, enabling the operator to customize the holster for his specific needs and modes of carry. Scorpus[®] Level 1 Retention System- features two separate opposing passive retention devices that capture the trigger guard of the handgun and are pressure activated. To draw the handgun, the operator must firmly hold the grip and then perform a clean draw.

Product Advantages

-  Picatinny
